WORK EXPERIENCE

REPUBLIC SERVICES

Phoenix, USA

Sr. Manager, Operations Technology

Sept 2023 – Present

- Recruited and developed a team of subject matter experts, which led to the successful adoption and operation of new fleet technology.
- Led the team that built and piloted Republic's AI camera based driver safety coaching program.
- Led a team focused on the continuous improvement and reporting of the AI refuse contamination detection system.
- Piloted the first fully integrated prototype electric vehicle, driving its adoption through field training.
- Evaluate and support any new fleet modernization technology.
- Developed and designed billing process for AI refuse contamination detection system that accelerated the project by six months, generating \$40 million in revenue.

Manager, Technical Operations

Jun 2022 – Aug 2023

- Developed and mentored non-technical team members, improving their analytical skills to enhance data analytics capabilities and streamline reporting.
- Partnered with Oshkosh Corp to develop the first fully integrated electric refuse vehicle by setting customer requirements for an improved cab and safety specifications.
- Design and developed the electric vehicle viability models that dictated EV deployment locations.
- Piloted electric vehicle pilots at different locations and compiled results to better inform fleet electrification strategy.

EVBOX

Amsterdam, NL

Systems Validation Engineer

Sep 2020 – May 2022

- Design, develop and execute automated firmware tests on current and next gen products for regression testing.
- Develop, deploy and maintain data acquisition infrastructure like databases, visualization tools and vpns on AWS.
- Design and develop one off test setups for unique test scenarios including data acquisition and generating reports.
- Design and develop test benches for correct and repeatable hardware and software validation and verification.

ETERNAL SUN SPIRE

The Hague, NL

Development and Validation Engineer

Aug 2018 – Jul 2020

- Troubleshoot issues with prototype and production Photovoltaic Test Equipment in Lab and Manufacturing lines.
- Design and develop control architecture for complex machines to enable optimal performance and data acquisition.

GENERAL MOTORS

Milford, USA

Hybrid Powertrain Development Engineer

Jan 2016 – Aug 2018

- Develop efficient powertrains with optimal fuel economy and exceptional performance via work on batteries, motors, hydraulic systems, internal combustion engines, and power electronics.
- Analyze and collect data from vehicles on test tracks, in extreme locations, and state of the art high feature test cell using vehicle monitoring software and hardware.
- Validate new hybrid and electric powertrains subjectively and objectively.

Algorithm Development Engineer – Thermal Controls

Jul 2015 – Jan 2016

- Developed thermal control system for liquid cooled High Voltage battery systems.

EDUCATION

UNIVERSITY OF WASHINGTON

Seattle, USA

Master of Science in ME, Control Systems

Sept 2013 – May 2015

MANIPAL INSTITUTE OF TECHNOLOGY

Manipal, India

Bachelor of Science in Mechatronics Engineering

June 2009 – May 2013

TECHNICAL SKILLS

Languages: Python, MATLAB/ Simulink, JAVA, C/C++, TypeScript, HTML, Structured Text (PLC), YAML, XML, SQL
Technologies: AWS, Grafana, Influxdb, Wireguard, MQTT, REST, Docker, Linux, SCADA, MODBUS, OPC, ARM, GIT
